

Invitation

Dear colleagues,

On behalf of the executive board of the Greek Operating Room Nurses Association, we would like to invite you to our **17th Meeting on Central Sterilisation**, which is taking place at the central amphitheatre of the “Papageorgiou” General Hospital of Thessaloniki, in cooperation with the administration and the Nursing Services, under the title **“Tracing Central Sterilisation: Reports and Guidelines”**.

The Central Sterilisation Meeting aims to trace, with scientific knowledge, the department of Central Sterilisation in Hospitals, and answer questions that torment its staff. The scientific programme covers a huge gap in the education of Nurses in Central Sterilisation and sets the foundations for systematic recording and monitoring of their training on a national level.

Furthermore, the content of the Meeting is contained in the relevant Manual that has been published by G.O.R.N.A., which we wish to establish as part of the basic and specialized educational programmes that concern Central Sterilisation.

I hope that the contribution of our colleagues, who willingly accepted the call to participate and fulfil the creation and writing of this scientific manual, will be read by all of us and be applied in all the Hospitals of the country, in order to develop the education and quality of care for Nurses of Central Sterilisation. Thanks to the authoring team!

Best regards,

The President of G.O.R.N.A.,

Ioannis Koutelekos
