DECONTAMINATION OF REUSABLE INVASIVE FLEXIBLE ENDOSCOPES MOD1641 (DL115045S)

Credit: 15

Level: 4 & non credited

Start Dates:

September 2012

On line induction week: 17 September 2012

Module: 24 September 2012

May 2013

On line induction week: 27 May 2013

Module: 3 June 2013

Location:

Distance Learning via Virtual Learning Environment

Duration:

Level 4 undertake 12 units over one trimester

Non-credit undertake 10 units over one trimester

DLUO0008PDL1

MODULE SUMMARY LEVEL 1

This module is aimed at decontamination technicians', supervisors', department managers' to decontamination leads. This on-line module aims to educate and inform evidence based practice that encompasses the decontamination of reusable invasive flexible endoscopes. Student learning will be facilitated by the university via a distance learning approach to acquire the appropriate knowledge and skills required to understand the process of medical device decontamination for reusable invasive flexible endoscopes. The module will cover individual preparation for the environment, the decontamination process, including cleaning, packing, storage and traceability. In addition, it will explore both local and national policies and regulations regarding Health and Safety, Control of Substances Hazardous to Health (COSHH) and Reporting of Injuries, Disease and Dangerous Occurrences Regulations (RIDDOR) in the workplace.

Students will undertake a series of formative e-activities and a summative assessment of a 3000 word written assignment at level 1.

NON ACCREDITED MODULE

This module is designed for decontamination technicians', supervisors', department managers' to decontamination leads. This learning zone module has the same approach as level 1 and level 2 but enables the student to gain non-accredited academic certificate of attendance which has been recognised by the UK's professional body, the Institute of Decontamination Sciences (IDSc). Students will undertake a series of formative e-activities to help develop their knowledge regarding decontamination of reusable invasive flexible endoscopes.

ENTRY REQUIREMENTS

There are no specific entry requirements as these modules are designed to educate and inform all levels of staff employed within the decontamination services.

DISTANCE LEARNING

September 2012

On line induction week: 17 September

Module commencement: 24 September until the 14 December 2012

May 2013

On line induction week: 27 May 2013

Module commencement: 3 June 2013 until the 9 August 2013.

FURTHER INFORMATION

If you require NHS contract funding for this course please speak to your Manager before applying'.
